PROJECTS

NETFLIX CLONE ⬈
HTML, CSS, JavaScript, React.js, Firebase, APIs, Redux Store

- The project is an ambitious initiative aimed at replicating the core functionalities of the renowned streaming platform Netflix.
- It revolves around three key functionalities: User Authentication, Search, and the Browse Page.
- The project features a robust User Authentication system that enables users to create accounts, login securely, and enjoy a personalized experience.
- The Search functionality is a pivotal feature, allowing users to find their preferred content within the vast library.
- The heart of the application lies in its Browse Page, designed to replicate the intuitive layout of Netflix.
